Toddler Class

We are excited to welcome the beautiful fall season into our classroom! This month, our children will explore the sights, sounds, textures, and traditions of autumn through hands-on activities, nature exploration, practical life skills, and creative learning experiences. We will also recognize **Fire Prevention Month** by learning age-appropriate fire safety concepts. Children will become familiar with the important role of firefighters, discuss basic fire-safety rules, and learn why it is important to listen to trusted adults during an emergency.

Primary Class

We are excited for fall and a month filled with fun learning activities! The children will love some of the special Halloween themed work they will begin to find on the shelves.

This month in Science we will begin by learning about the difference between plants and animals. Then we will focus on studying animals – the difference between vertebrates and invertebrates, then dive into the largest class of invertebrates, Arthropods! Yay for bugs! ☺

In Social Studies, we will continue our study of the continents and oceans, adding the idea of hemispheres, then making the jump from sphere to plane as we introduce our amazing puzzle maps.

For our Peace lessons this month, we will continue learning our Mindful Movements series which will help us to feel calm and focused as we begin our worktimes.

In Music, we will have fun celebrating the themes of the season with songs about spiders, bats, and pumpkins. And speaking of pumpkins, later this month we will design and carve pumpkins and eat the toasted seeds.

We are looking forward to all the fun that October brings!
